# Chapter 3

## Basic Instructions

### 3.1 Batteries Setup

One set of 4 AA batteries or two sets of 4 AA batteries are required to power the lock.

### 3.2 System Start and Shutdown

#### Start

Make sure the batteries are properly installed, then start the system as follows:

- Scan your fingertip at the authentication lens

OR

- Press **ENTER**

The screen will lighten up after system start.

#### Shutdown

System will automatically shutdown when not in use.

# Chapter 4

## Quick Start

Functions		Operation
Enter	System Menu	1/ Press <b>START</b> 2/ Press <b>MENU</b> 3/ Enter Admin Fingerprint (Default: none)
New	Admin	1/ Enter System Menu 2/ Select "2.Manage Users" 3/ Select "1.Add User" 4/ Select "1.Add Admin FP" 5/ Scan Fingertip Twice 6/ Enter a Name. <b>ENTER</b> to Save
	User	1/ Enter System Menu 2/ Select "2.Manage Users" 3/ Select "1.Add User" 4/ Select "2.Add User FP" 5/ Scan Fingertip Twice 6/ Enter a Name. <b>ENTER</b> to save

## 4.1 Open the Door

### with Finger

Scan your fingertip on the authentication lens. Push the handle.

### Best Practices

To guarantee an optimal authentication:

- Make sure your finger is clean & dry
- Align your finger parallel to the authentication lens
- Do not move your finger for 2 seconds while scanning

### with Password

Enter password & press **ENTER** to unlock the door. Push the handle.

### Smart Password

To confuse people looking at you when you type your password, it can be inputted within a random string of number. If your password is **888888**, the following combinations will still unlock the door:

- 1289888888
- 8888887556
- 8746388888451879

with Card - (S710FPC Only)

## 4.2 Close the Door

The 3 locking bolts automatically trigger out when you close the door.

### Closing the Door

Do not press the handle down when closing the door, just gently push the door.

# Chapter 5

# Chapter 6

## Lock Functions

### 6.1 Alarm Functions

#### 6.1.1 Illegal Intrusion Alarm

If an illegal intrusion occurs, such a thief trying to pick-lock your door, a buzzer will ring and the following will be displayed:

#### 6.1.2 Multi-attempts Alarm

After multiple failed authentication with fingerprint, card or password, the system will freeze for 3 minutes.

#### 6.1.3 Unlocked Door Alarm

If the door is not properly close, a buzzer will ring and the door will display the following for 60 seconds.

## 6.2 Batteries Low

- When the batteries are low, a buzzer will bip as a warning when you open the door & a message will be displayed on the screen at the same time.
- Check the system time after batteries replacement, because time information will be stored only 2 minutes without power.
- Recycle the used batteries according to the related laws and regulations of your country.
- 2 different warnings will informed you about the state of your batteries:

### 6.2.1 First Warning

At first warning, the door can still operate for about 100 times, please replace the batteries as soon as possible.

### 6.2.2 Second Warning

At second warning, the lock cannot operate anymore, you should use the emergency battery or the mechanical key.

## 6.3 Emergency Battery

In case the lock runs out of battery. You can power the system with a 9V battery.

Just plug a 9V battery on the 2 9V battery pins located at the bottom of the front panel and you can operate your lock as usual. Don't forget to change your batteries afterward.

## 6.4 Locker Function

### Close Position

When the 3 locking bolts are out, turn the locker upwards. The lock will always be close. Nobody can open the door from outside (either with Fingerprint, Password or Mechanical Key).

### Open Position

When the 3 locking bolts are inside the lock, turn the locker upwards. The lock will always be open. The door can always be opened from the outside.

## 6.5 Mechanical Key

In case of system failure or damage, the lock can still be opened with a key. The keyhole is located at the bottom of the front panel.

We advise you to leave the keys outside of your house, so you can get one of them in case of emergency.

## 6.6 Factory Reset

To delete all datas stored in the lock, proceed to a factory reset:

1. Open the battery cover, leave one set of 4 batteries and take one single battery out
2. Keep press **Reset Button** with the Reset Stick and re-install the battery

3. "Factory Reset?" will display on the screen, press **ENTER** or **START** to confirm. Factory settings are restored.

### Attention

Factory reset will delete all the datas in the system:

- Admin Fingerprints
- User Fingerprints
- Password
- Log-in Record
- Time
